From the classroom to the boardroom and beyond, making your people a priority is what will seal the deal, reach your goals, and make your people want to put their best foot forward. The tools every leader needs to succeed is packaged up and broken down into communication, connection, and confidence. Learning to LEAN IN starts with you and moves into your circle of influence. ## The LEADING Priority – Building Leaders in every space and at every age

Learning to be a good leader can start at any age and is a skill that will grow you in every area of life. These strategies to build leadership skills can take any organization or individual from a weakest link to an impactful influencer. When 77% of organizations report that leadership is lacking, it is more important now than ever before to groom people early on to be strong enough to lead well.

## Brave it 'til You Believe It – Why “Fake it 'til you Make It” doesn't build a confident you

I struggled to feel like I fit. The story I let myself believe created a mean internal judge, a people pleaser mentality, and a scared-to-dream little girl. I learned to cling tightly to the idea of “Fake it 'til You Make It” when in fact that created more issues. When 67% of people are holding on to that phrase like I did, we are setting ourselves up for failure. The truth is, we need to cling less to faking it and more to believing it on the journey we bravely choose. Learning how to flip your mindset and show up as your best self is the confidence booster anyone can grow from!
