## **The Creative Juices Retreats**

A mechanical and metaphysical methodology event that teaches the concepts of **thinking differently** and manifesting one's vision of self.

[www.thinkdifferentnation.com](http://www.thinkdifferentnation.com)

# The event

The **Creative Juices Event Series** was established to provide exclusive access to life-changing methodologies and systems with personal guidance from **Tye Glover**.

- Who is this event for? "If you are a Seeker wanting to know the unique qualities that make you creative and how to Think Differently, then join me for this extraordinary retreat, where the threads of truth from myths and wives' tales of the past will come alive and align to empower you to live your greatest purpose."
- The events themselves are a series of retreats designed to introduce the concept of **Neural Creative Programming** to an intimate group of participants/seekers at each event.
- This exclusive series of events is designed to coach and guide **Seekers of Knowledge** in discovering the rules and processes that support an overall greater understanding of the origins of creativity while gaining deep insights into how individuals experience ideas.

## About Creative Juices

Creative Juices is THE premier consulting service under the **Think Different Nation** umbrella that teaches Seekers of Knowledge the power of Active Imagination (AI). A phrase coined by Carl P Jung in the mid-20th century, AI translates to a conscious act of focused attention yielding rewarding returns.

Think Different Nation's Founder and President, **Tye Glover**, has mastered the power of AI and has combined it with the psychological methodology of Neuro Linguistics Programming to develop an exclusive system that enables a person who is naturally inclined to seek excellence to learn to "THINK DIFFERENTLY" by more effectively harnessing their life's experiences.

## A Message from Tye Glover

### *Sum Total of our Experiences*

*The Universe is rules-based, and Seekers of all flavors have searched tirelessly for 1,000s of years to identify those rules because **Nothing can come from Nothing.***

*My name is Tye Glover, and the Creative Juices (CJ) event series introduces the world to the rules that govern how humans identify creative ideas. I have developed a unique program that examines how people create by capturing experiences using the five basic senses - a process known as Neuro Linguistics Programming - and use **The Event** to guide Seekers of knowledge on their journey of discovery.*

*As a catalyst in the CJ program, the more creative strains of cannabis are used as a critical ingredient to bridge the conscious mind with the subconscious mind, and through this process, our Seekers learn to experience more deeply the ingredients of their creations. I ask you to partner with me on this meta-physical journey where your brand will be positioned as a key source or nutrient for one's creative juices.*

*-Tye*

# Why You Should Join Us

- Many of us have come to believe that great ideas come from this mysterious, unknown place within the ether and that very few people know the secrets to tapping into that place.
- **In truth**, whether they have realized it or not, the most innovative minds have practiced a form of Mental Alchemy through which they were able to bridge the subconscious mind (our stored experiences) with the conscious mind, through directed thought and intention.
- **The Creative Juices' events** are designed to teach Seekers of Knowledge the mechanical process of how we think and how the metaphysical process of Active Imagination (AI) can be controlled to direct the course of idea generation.
- **When combined with cannabis as a catalyst**, the returns of a conscious act of focused attention can be **10 times** that of a non-psychoactive experience, creating new paths for discovery.

Learn how cannabis can induce a hypnagogic effect creating pathways to the subconscious mind.

Join us for an incredible weekend where you experience cannabis-infused cuisine in beautiful downtown DC, as just one additional step within the weekend's journey of discovery.

# FIND MORE TOOLS FOR YOUR Creative Trade

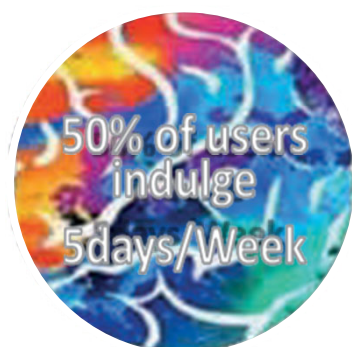

- For decades, creative communities art, music, and literature, among others, have known of the power and importance of their tools during the process of creation.
- For many, it was less about getting “high” and more about tapping into their greatest moments of insight and creative pathways.
- Even occasional users occasionally profess recognizing that a connection exists with cannabis and the ability to increase their boundaries of thought outside of even their traditional boxes. For most, however, it’s an uncontrolled journey.
- With the tide of cannabis usage increasing nationally, more and more people are experimenting with cannabis. Few, however, know how to leverage its benefits for directed and effective ideation. With my **Creative Juices Retreats**, I will show you how.

Cannabis Users by The Numbers		
Users by Age	% of Cannabis Users	Accumulated users
25 - 34	26%	80%
35 - 44	22%	54 %
45 - 54	16%	32 %
55 - 64	16%	16%

## What Are the Most Common Reasons for Using Cannabis?

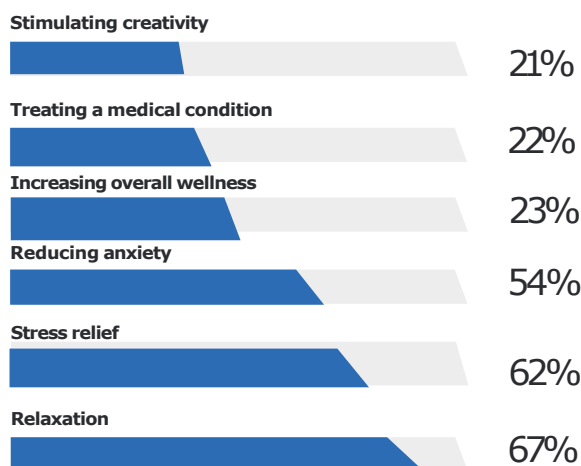

The **top three** reasons are relaxation (67%), stress relief (62%) and to ease anxiety (54%), with 21% of survey respondents using to enhance creativity.

Daily Usage

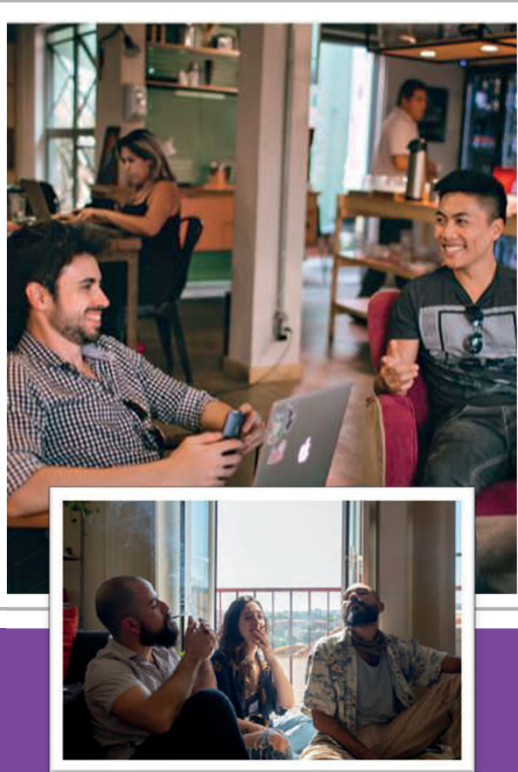

Increase in Female users Q1, 2020 to 2021

# WHAT HAPPENS AT A CREATIVE JUICES EVENT?

During an exclusive 2.5-day retreat, attendees learn the rules of **Active Imagination** using **Cannabis** as a catalyst for discovering ideas. This is an experience-based program where seekers create their journey led by the structure of ancient hermetic rules and intensified by the sacred **Cannabis** plant.

## A CREATIVE JUICES EVENT:

- Teaches Seeker's directed consciousness as a method of ideation. By using AI and a Neuro-Linguistics Programming based approach in conjunction with **Cannabis**, participants are able to explore how humans identify ideas and train in the conscious direction of thought.
- Guides attendees as they learn the rules of AI using **Cannabis** as a catalyst for discovering ideas that can lead to **revolutionary new products, services, and benefits to humanity.**

## THE TYPICAL PLANT-BASED EVENT

Offers a combined Cannabis and sensory stimuli experience designed to invigorate the attendee's perception within a natural environment: Drum circles, dance, and ritualistic ceremonies are popular examples. Relaxing? Yes.

Life-altering ideation creation that can change the world? **NO.**

# Event Programming + Dates

During the **Creative Juices Immersive Workshop**, attendees will:

- **Work** to create a vision and path for expanding what they believe is possible through the understanding of ancient hermetic teachings.
- **Learn** how to use cannabis to consciously create what the participant seeks while gaining increased power over their thoughts which will strengthen their field of focus as the visions materialize.
- **Study** and implement the processes of active imagination and world-building as well as practice overarching rules from which every idea emerges.
- **Recognize** how to leverage the understanding of Neuro-Linguistic Programming (NLP) to gain insights into the mechanics of how humans capture information both consciously and unconsciously.
