"I had the incredible opportunity to both attend and volunteer at the Resilient Women in Business Series' inaugural conference in Calgary. Kim and I had connected virtually via LinkedIn and a virtual coffee where she was gracious enough to invite our team to be vendors. We communicated by email for a few weeks to plan the logistics and it was not until the day before the event that we finally met in person (the amazing power of technology and social media!) As a vendor for our non profit 'Young Women in Business', we had the opportunity to showcase our organization, along with several other incredible community leaders and entrepreneurs in Calgary who had vendor booths as well. International speakers flew in to share their experiences, knowledge and wisdom with attendees at the event, and the positive energy in the room was contagious! After having been in pandemic lockdowns for several months it was refreshing to be surrounded by resilient women in business who persevered, and continue to pave the way in the world of entrepreneurship. I highly recommend this conference to any individual regardless of gender as you will be sure to make new connections, and be inspired. Thank you Kim, and team for the wonderful hospitality!!"
